**PUBLIC SAFETY INTEREST GROUP JOINS MOTOR CARRIERS TO
PETITION FOR FEDERALLY MANDATED 68-MPH SPEED GOVERNORS ON
HEAVY DUTY TRUCKS**

ATLANTA and GREEN BAY, Wis. – In what is believed to be the first Federal Motor Carrier Safety Administration (FMCSA) petition jointly filed by a public safety interest group and a group of motor carriers, Road Safe America and Schneider National Inc. petitioned the FMCSA last week to require electronic speed governors set at not more than 68 mph. The proposed regulation would affect class 7 and 8 trucks manufactured after 1990 (in 1991 speed governors became standard equipment). Eight other motor carriers including J.B. Hunt Transport Inc., CR England Inc., Covenant Transport Inc. and Dart Transit Company also signed the petition, which was filed with the FMCSA on Sept. 11.

Bill Graves, president and CEO of the American Trucking Association (ATA), has already submitted a letter of support for this measure to the FMCSA. The petition will be available for public comment as soon as it is docketed for rule making by the FMCSA.

Recent FMCSA studies suggest limiting the speed of commercial trucks will have a significant impact on safety. According to the FMCSA's *Large Truck Causation Study*, "traveling too fast for conditions" was the single most frequently cited factor in large truck crashes where trucks were assigned a critical reason.

"The 80-mph 80,000 lb. truck has no place on our highways," said Steve Owings, who co-founded Road Safe America after he lost his 22-year-old son, Cullum, in a high-speed truck accident. "This petition is a matter of life and death for drivers of passenger

cars, as well as for professional truck drivers. And it is a matter of economic common sense for the companies that put trucks on the road.”

Don Osterberg, vice president of safety and training for Schneider National Inc., joined Steve Owings in supporting what he has called “one of the most important safety initiatives in commercial vehicle transportation in the last 20 years.”

“Historically, carriers have waited for regulations to come down from the federal government and not been actively engaged in the process,” said Osterberg. “What’s unique in this filing is that a core group of responsible carriers is stepping up and initiating a proactive change for improving public safety. This is good for drivers, good for the motoring public and good for the entire trucking industry.”

Schneider is among a growing number of national carriers that maintains speed governors on their trucks at below 68 mph. In addition to safety improvements, carriers already governing their trucks’ top speed at these levels cite savings in fuel consumption, liability costs and equipment wear and tear as business reasons for the limitation.

About Road Safe America

Atlanta-based Road Safe America is working to make our highways safer by reducing the number of collisions between large trucks and passenger vehicles. Many trucks travel at dangerously high speeds, making it impossible for them to stop safely in an emergency. Road Safe America is working toward a national rule that requires operational speed governors in trucks, limiting them to 68 miles an hour, with serious consequences for violators. Passenger vehicles are responsible for many tractor-trailer accidents, as well. Therefore, Road Safe America also works to educate the driving public on how to safely share the road with large trucks. For more information, please visit www.roadsafeamerica.org.

About Schneider National, Inc.

Green Bay, Wis.-based Schneider National Inc. is a premier provider of truckload, logistics and intermodal services. Serving more than two-thirds of the FORTUNE 500[®] companies, Schneider National offers the broadest portfolio of services in the industry. Schneider National has provided expert transportation and logistics solutions for more

than 70 years. A \$3.5 billion company, Schneider National conducts business in more than 28 countries in North America, Europe and Asia, and continues to grow its international service offerings. For more information about Schneider National visit www.schneider.com or call (800) 558-6767.
